Shawn

We still have not received a response from the KO to MCM emails attached requesting an indemnity and hold harmless for releasing these vessels to Seaward. MCM fully cooperated in the January transition and we will continue our cooperation as long as safety, operational, schedule maintenance requirements, and other requirements are honored and respected. We have planned our operational, schedule maintenance requirements, around the schedule you have provide yesterday that's less then 24hrs old, and now we have a new schedule with no notice to provide access to YTB-820 for Seaward training. As directed, I will turn over the YTB-820 to Seaward and cancel all maintenance schedule on the Tug for today. We would request that we be provide the courtesy of at least 24hrs notice of any schedule changes. Seaward inability to plan a schedule, shouldn't interfere with our contract requirements. I don't want the lack of planning on Seaward's part to be characterized as a lack of cooperation on MCM's part.

Dear Mr. Stacey,

We have received your vessel usage request. Under its contract, MCM is responsible for the port operations to include safe operation of the vessels and management of the port. We have provided insurances to cover the property, our workers and third parties from damage and death. We have developed over the years, with the Navy's review and approval, safety and other operational programs. Releasing vessels to Seaward before our contract is complete could subject MCM to liability since we do not know that (b) (4)

(b) (4)

Please refer to the Navy PQS for these vessels and supply us with the information that the persons operating these vessels possess these qualifications. The Ferry and Tugs are unique boats and we have not been provided the properly qualified personnel to sign off for these vessels.

We had understood that the transition ended on January 31, 2017. We are concerned about the safety and well being of the Base residents, the workers on the vessels and the ships themselves (which require substantial maintenance and care in operations to keep them running safely, efficiently and reliably despite their advanced age). Please provide the requested information and indemnities so that we may process your request.

Sincerely,

JUAN PEREZ

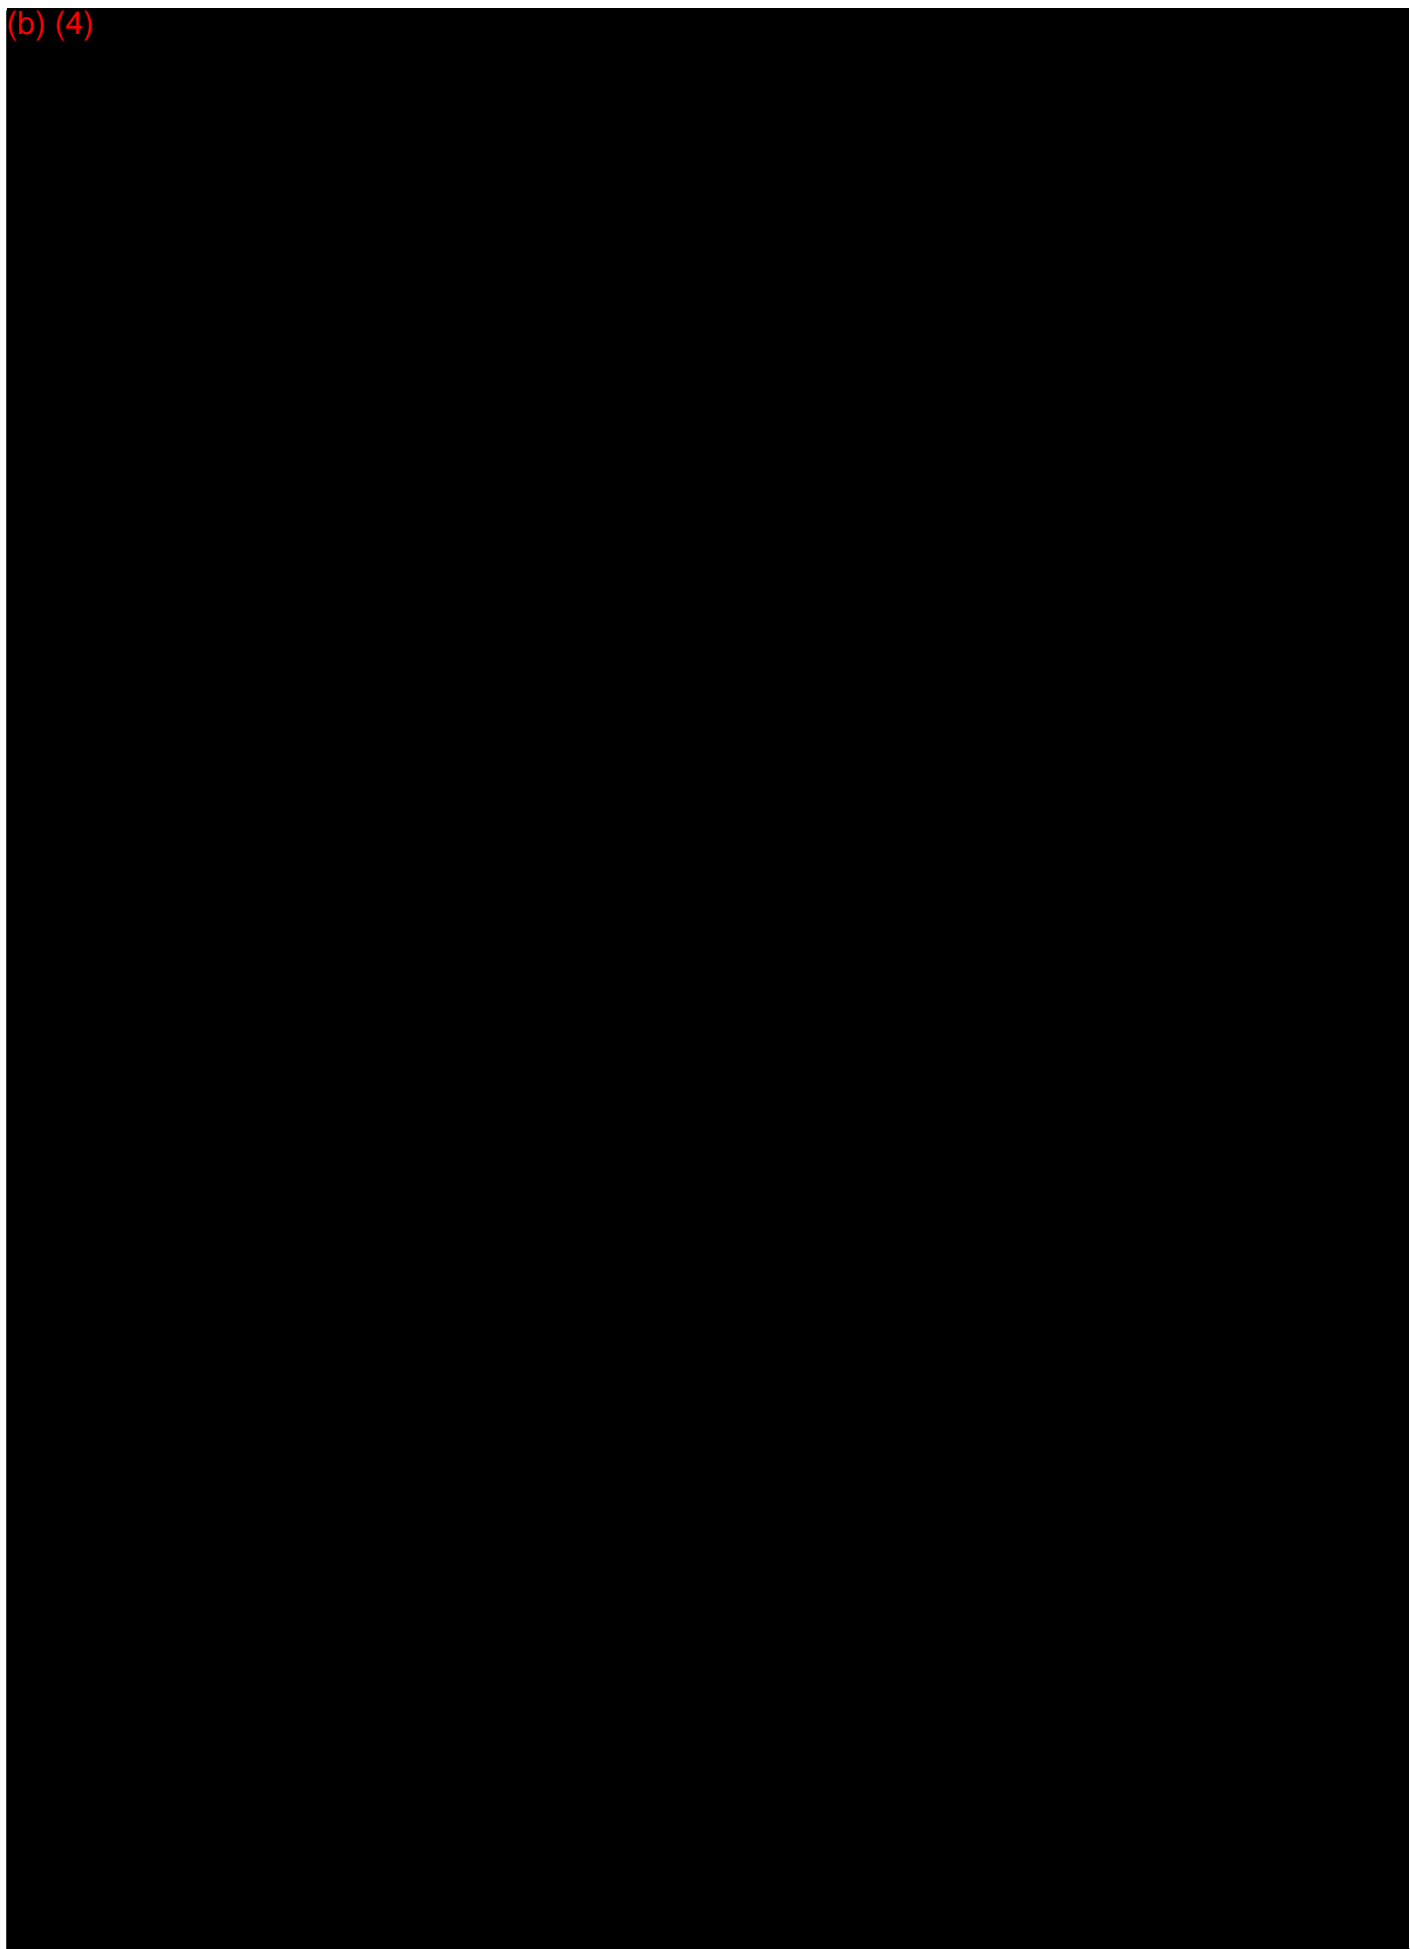

Director of GTMO Operations

Shawn

We still have not received a response to our letter requesting an indemnity and hold harmless for releasing these vessels to Seaward. This is especially critical since the Navy has not provided us the necessary qualifications of personnel demonstrating their capability to operate the vessels. Please provide us the requested indemnity before the vessels are taken out. The YFB 92 will still be under repairs tomorrow and will not be available. Also what UB will they be using for training tomorrow, and the LCM-8 does not have any schedule runs for tomorrow. Just to make sure we are clear about Sunday, Seaward will have a Ferry, YTB, and LCU underway all at the same time with unqualified crews onboard, and with Seaward's limited time to train personnel who are apparently unfamiliar and unqualified to operate the vessels, the Navy will not hold MCM responsible for any damage or losses that may occur from their operation to include property damage, personal injury and death. Even with these assurances, MCM still needs the indemnity against third party claims. I am greatly concerned that necessary safety and operational requirements are being relaxed to salvage a contract action. Our firm fully cooperated in the January transition and we will continue our cooperation as long as safety, operational and other requirements are honored and respected.

Marty,

Here is the updated schedule. Also as per our conversation this afternoon Seaward Capt. Sully will be walking around tomorrow morning with a couple of their personnel for Sounding & Security training.

Shawn,

Attached is the revised vessel usage request.

The changes are highlighted in yellow.

Due to interference from MCM, this is a more compressed time schedule.

Marty,

Here is the craft schedule. The plan is operational YFB and this afternoon YTB. Possible UB if I can get navy personnel freed up!
